RESEARCH

RIT CENTER FOR COMPUTATIONAL RELATIVITY AND GRAVITATION | GRADUATE RESEARCH ASSISTANT

Aug 2016 – present | Rochester, NY

With **Dr. Jason Nordhaus** and **U of R Astrophysics Department**, I create 3D Magneto-Hydrodynamic (MHD) simulations of post-main-sequence stellar interactions to refine and extend current theories about various object formation. Simulations are done with the multi-physics code **Astrobear** and the output is reduced with the visualization software **Visit**.

RIT NATIONAL INSTITUTE FOR THE DEAF

| GRADUATE RESEARCH ASSISTANT

May 2020 – present | Rochester, NY

With a small group of Physicists and Deaf Education specialists at the NTID, we are working to construct a new library of signs to improve the clarity of physics communication to deaf and hard of hearing students. My responsibilities include providing input for lesson plans and directing/editing of video teaching aids.

GENESEO PHYSICS DEPARTMENT | UNDERGRADUATE RESEARCHER

May 2015 – Aug 2015 | Geneseo, NY

Worked with a team of undergraduates to train a machine learning code to identify various objects in the Hubble Legacy Extragalactic Survey (**LEGUS**).
